WHO WE ARE

We are a multi-disciplined team of networked engineers, designers and project consultants. That provide services to domestic and international clients in the delivery of power, renewable energy, hydrogen and CCUS projects.

OUR AMBITION

Our ambition to become the preferred global provider of technical, project, construction, and operational support services and create value for our clients, centred on collaboration, quality, reliability and a drive toward excellence and prosperity for our people and our communities, is not surpassed by our vision for the clean, sustainable future for all.

”

We have successfully delivered projects for both national and international clients.

“

OUR SERVICES

FEASIBILITY AND FEED

We provide our clients with project engineering and management services in the early development of projects from concept and feasibility through to Front End Engineering Design (FEED) phases.

DETAILED DESIGN

With successful completion of the initial project phases, we support our clients with continued project engineering and management through the detailed design, procurement and contract management phases of their project.

CONSTRUCTION SUPPORT

We compliment our engineering and project management support with provision of construction and commissioning services through the construction and commissioning phases of the project through to successful operational handover.

LEADERSHIP

- Committed, empowered, and rewarded people
- Delivering profitable sustainability
- Integrity in all aspects of business
- Energy and excitement
- Efficient bureaucracy

PERFORMANCE

- Commitment to Zero harm people and the environment
- Results and value creation for our clients, employees and contractors
- Creating wealth for our shareholders
